Stairs with Italian design and German quality craftsmanship for clients around the world

**ELEGANCE**

# TAK-ROOM HUDSON YARDS

SILLER has performed this custom handrail design which was fitted on top of an existing steel structure. Latest techniques in combination with traditional craftsmanship and experience helped us to achieve this task.

One of the most outstanding architectural projects of the last years was the Hudson Yards in New York. Within the multi million Dollar project the TAK-Room restaurant was created which contains this feature staircase..

# NOTHING BUT ART

The style is a bit outdated but the design is still one of our favourites. True wood work is what we love.

Built in the last century this staircase stands for quality craftsmanship and love for attention to detail..
